EDUCATION

University of Chicago, Chicago, IL
BA: Physics, June 2014

Recurse Center, New York, NY
August 2015 - November 2015

I got to spend three months learning about whatever I wanted to, which was mostly Haskell.

- Worked through a course, which went from logic gates to designing a CPU to writing a compiler
- Completed several small projects in Haskell, including a compound Chinese character generator with a browser front-end
- Reimplemented core Git features in Haskell

EXPERIENCE

Center for Data Intensive Science, Chicago, IL

Software Engineer, April 2015 - August 2015

- Eased geospatial data processing by writing a framework to run analytic scripts with Hadoop and Spark
- Shared analytic results by integrating above framework with Django and GeoServer

University of Wisconsin-Madison, Madison, WI

Associate Research Specialist, October 2014 - March 2015

- Enhanced nuclear fuel cycle simulation by writing a neutronics data generation tool in Python

Heritage Chinese Center, Mountain View, CA

Software Developer, June 2014 - April 2015

- Designed and built Chinese vocabulary training games using Javascript
- Adapted Django backend to suit evolving needs of curriculum, students, and teachers
- Ported webapp to iPad using Phonegap

Mission Street Manufacturing, Santa Barbara, CA

Software Developer, June 2013 - August 2013

- Enabled children to design and print 3D models by connecting Raspberry Pi, 3D printer, iPads, and AWS server
- Wrote native iOS app to design 3D objects by revolving a sketch
- Built rudimentary constructive solid geometry rendering engine for iOS

FLASH Center for Computational Science, Chicago, IL

Research Assistant, October 2012 - June 2014

- Contributed to PyNE, an open-source nuclear engineering toolkit written mostly in Python
- Constructed infrastructure for accessing and processing nuclear data
- Optimized data parsing for speed using Cython

SKILLS

Languages: Proficient with Python, Haskell, JavaScript, HTML5/CSS, L^AT_EX

Tools: Linux, Git, Django, Flask, Hadoop, Spark, PostgreSQL, PostGIS, AWS
